

MagicMend™ Repair Fittings

MagicMend™ Pipe Extenders

Save valuable fittings and time with the MagicMend Pipe Extenders. The MagicMend is extremely effective and easy to use. Simply cut the defective fitting from the system, remove it and install the Extender. The MagicMend will work at any glued plumbing joint, providing a permanent, invisible repair with insignificant flow restriction. The MagicMend is available in 1/2" through 4" IPS sizes for Schedule 40 Pipe and 1", 1 1/4", 1 1/2" and 2" sizes for Class 200 Pipe.

MagicMend™ Insider Connectors

Why use an additional fitting when you can use a MagicMend Insider Connector? The MagicMend Insider Connector will join two pieces of PVC Schedule 40 pipe together. Should a pipe be cut off flush with concrete or buried underground, a MagicMend will easily solve the problem. The MagicMend Insider Connectors are available in 1", 1 1/2", 2", 3" and 4" IPS sizes.

MagicMend™ Extender Fittings

The MagicMend Extender Fittings are designed to slip over fittings where there is not a sufficient amount of pipe left to connect to. Remove any excess pipe; clean the debris from the area to be repaired and install the MagicMend Extender Fitting. To complete the repair, solvent weld PVC pipe to the opposite side of the MagicMend. The MagicMend Extender Fittings are available in 1 1/2" and 2" IPS Sizes.
