

Spa Drain Valve

Simplify your servicing needs with Magic Plastics' new Patented Drain Valve. Manufactured from Impact-Modified

ABS and equipped with a total of 5 Teflon-Impregnated O-Rings, the Magic Drain Valve is extremely accessible to the consumer and easy to use. Specifically designed for Skirt or Kick-Plate installations, the Drain Valve is flush mounted to the wall and secured in the closed position. To operate, pull the spout out (approximately 2") leaving the exterior end cap on. Once extracted, by design, the Drain Valve will stay in the closed position. After the garden hose is installed, push the spout back in halfway to actuate the drain. The valve is also equipped with a removable bezel in order for the skirt to be detached without disturbing the plumbing. The Magic Drain Valve also has built in freeze protection and will drain approximately 5 gallons per minute. The Magic Drain Valve is available in 1/2" Slip or 3/4" Barb configurations.
