- Removes sand, silt, pebbles–even small rocks
- Thumb-controlled vacuum activation
- Built-in removable filter with easy-clean access
- UV-stabilized transparent collection chamber
- Lightweight design: under 2 lbs
- Includes telescoping pole (extends to over 7 feet)
- Fully serviceable design

Cleans Like Magic–No Power, No Pumps, No Hassle

The **MagicVac** from **Magic Plastics** is a self-powered **pool and spa vacuum** that delivers big cleaning performance without the need for electricity, batteries, hand pumping, or external connections. Lightweight, ergonomic, and easy to use, **MagicVac** is the **ideal solution for removing sand, pebbles, and debris** from hard-to-reach areas **in spas, hot tubs, and small pools**.

How It Works

Simply place your thumb over the ergonomic air hole at the top of the MagicVac Pole, submerge it near the debris, and release your thumb. This creates a vacuum effect, drawing water and debris into the clear UV-stabilized chamber. Once the chamber is full, raise it above the waterline to drain. Debris is captured in a built-in, removable filter, allowing for fast and easy disposal.

Quick, Easy Assembly in 4 Simple Steps
